

Email Security Triage Report

Analyzed file: sample_phishing.eml
Generated: 2026-08-13 05:43 UTC · Pipeline v1.0

VERDICT: SUSPICIOUS

Risk score: **52.2/100** · Confidence: **medium**

1. Email Summary

Field	Value
Subject	Urgent: Your GlobalPay account is suspended - verify now!
From	GlobalPay Security <security@globalpay.example>
To	victim@company.example
Date	2026-07-17T10:22:31+03:00
Attachments	invoice.docm

2. Risk Signals (Verdict Engine)

Points	Signal	Explanation
+30.0	header_risk	header risk_score=100; critical: Reply-To domain (mail-secure-login.xyz) differs from From domain (globalpay.example) — replies are diverted to a different party, a classic phishing pattern.; SPF check failed (fail) — the sending server is not authorized / the signature is invalid.; DKIM check faile ...
+7.2	body_anomaly	body anomaly score=36.0; verdict=SUSPICIOUS
+10	risky_attachment	risky attachment extension(s): invoice.docm
+5	html_only_links	2 URL(s) present only in HTML attributes (possible hidden/mismatched links)

3. Header Analysis

Headers show strong indicators of spoofing/phishing (4 critical, 2 warning finding(s)).
Header risk score: **100/100** (high) · SPF: **fail** · DKIM: **fail** · DMARC: **fail**

Severity	Code	Finding
CRITICAL	REPLY_TO_MISMATCH	Reply-To domain (mail-secure-login.xyz) differs from From domain (globalpay.example) — replies are diverted to a different party, a classic phishing pattern.
WARNING	RETURN_PATH_MISALIGNED	Return-Path domain (mail-secure-login.xyz) does not match From domain (globalpay.example) — possible spoofing or a bulk-mailing service.
INFO	MSGID_DOMAIN_MISMATCH	Message-ID domain (mail-secure-login.xyz) differs from From domain — weak spoofing signal (some providers do this legitimately).
CRITICAL	SPF_FAIL	SPF check failed (fail) — the sending server is not authorized / the signature is invalid.
CRITICAL	DKIM_FAIL	DKIM check failed (fail) — the sending server is not authorized / the signature is invalid.
CRITICAL	DMARC_FAIL	DMARC check failed (fail) — the sending server is not authorized / the signature is invalid.
WARNING	UNKNOWN_RELAY	Hop 1: relay mail-secure-login.xyz has no valid reverse DNS ('unknown') — common for botnet/compromised senders.

4. Body Analysis

Anomaly score: **36/100** · Verdict: **SUSPICIOUS**
